

## Robex Concrete Floor Paint

A superb polyurethane based floor paint for warehouses, workshops, garages, showrooms, offices and schools. Robex Concrete Floor Paint will seal dusty concrete floors and provide an excellent barrier against oil, dirt, grease, etc.

## Robex Concrete Floor Paint

- Quick drying and easy to apply
- Resistant to oils
- Hard wearing
- Mid gloss Finish
- Good Adhesion

### Standard Colours

### Preparation

New concrete should be at least 28 days old or the moisture content less than 5%. All floors must be thoroughly dry and clean, vacuum shot blasting is recommended especially on old dense floors.

## Robex Concrete Floor Paint

### Preparation

Acid etching on floors is not recommended with moisture curing products as the extra dampness imparted by this process can detract from the 'key'. Should it be necessary to use Robex Power Prep E prior to coating, the concrete must be rinsed thoroughly with water and allowed to dry. It is important that no moisture is present before application.

### Mixing Ratio

Single pack, however, contents must be stirred thoroughly prior to use.

### Application

Apply by brush or roller. For previously unpainted surfaces two coats of Concrete Floor Paint are recommended.

### Curing Time

Touch dry: 2 – 3 hours @ 20°C

Hard dry: 12 hours @ 20°C

Full Cure: 7 days @ 20°C

### Coverage

40 – 50 m<sup>2</sup> per 5 litres per coat.

Two coats normally required.

### Storage

Store in cool, dry conditions away from direct sunlight.

### Storage Life

12 months in original sealed containers

### Cleaning

To clean brushes, equipment, contaminants, etc., we recommend the use of Robex Cleaning Solvent RX117

### Health and Safety

Please refer to the relevant Material Safety Data Sheet.
